PANNAGA J M

pannagajm@gmail.com +918762946709 Bangalore https://www.linkedin.com/in/pannaga-jm/ https://github.com/pannaga-j-m

Education

East West Institute of Technology, Bangalore 2022 – 2026
Bachelor of Engineering (B.E.) in Information Science and Engineering

Experience

DevOps Intern Bangalore
Vtricks Technologies Feb 2026 – May 2026
Responsibilities

- Assisted in building and maintaining CI/CD pipelines using **Jenkins** and **GitHub Actions** for automated application deployment.
- Built and managed **Docker** images, pushed them to **Amazon ECR**, and deployed containerized applications to **Amazon EKS**.
- Provisioned and managed AWS infrastructure using **Terraform**, including **EC2, VPC, IAM, Security Groups, and S3**.
- Monitored and managed Kubernetes resources such as **Pods, Deployments, and Services**, and troubleshot deployment issues using **kubectl**.
- Collaborated with the development team using **Git**, participated in Agile sprint activities, and documented deployment processes and infrastructure changes.
- Assisted in building and maintaining CI/CD pipelines using **Jenkins** and **GitHub Actions** for automated application deployment.
- Built and managed **Docker** images and pushed them to **Amazon Elastic Container Registry (ECR)**.
- Built automation scripts using Linux shell commands.
- Managed containerized applications using Docker and Kubernetes.
- Worked with AWS cloud services including EC2, IAM, S3, and Lambda.
- Used Terraform to automate infrastructure provisioning.

Projects

Blockchain-Based Agri-Food Supply Chain

- Developed an application for tracking agricultural products throughout the supply chain.
- Implemented product lifecycle tracking to improve traceability and transparency.
- Enabled product history verification through blockchain-based records.

https://github.com/pannaga-j-m/agritech-blockchain-based-agri-food-supply-chain-management

Serverless Feedback Web Application

- Developed Python-based backend functionality and REST APIs for submitting and processing user feedback.
- Implemented input validation and configured IAM permissions to secure access to AWS services.
- Integrated API Gateway, Lambda, and DynamoDB to support a scalable, serverless application architecture.

AWS Static Website Hosting

- Deployed a static website using Amazon S3 and CloudFront, configuring domain mapping and HTTPS.
- Automated deployments using AWS CodePipeline and configured secure access with IAM and bucket policies.

https://github.com/pannaga-j-m/hostingwebsites

FlightOps DevOps Pipeline

- Built an automated CI/CD workflow for a Spring Boot application using Jenkins and GitHub.
- Containerized the application with Docker and deployed it to Amazon EKS using Amazon ECR.
- Automated AWS infrastructure provisioning with Terraform to support repeatable deployments.

https://github.com/pannaga-j-m/FlightOps-DevOps-Pipeline

Certifications

DevOps Internship Certificate – Vtricks Technologies May 2026

AWS Solutions Architecture Job Simulation – Forage Nov 2025

Technical Skills

- **Programming Languages: Python, Java,C,C++**
- **Computer Science Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems**
- **Databases: MySQL, SQL, DynamoDB**
- **Backend Development: REST APIs, API Gateway, AWS Lambda**
- **Cloud Technologies: AWS (EC2, S3, EKS, IAM, VPC, CloudWatch)**
- **Software Development & DevOps: Git, GitHub, Jenkins, Docker, Kubernetes, Terraform**
- **Build Tools: Maven**
- **Operating Systems: Linux, Ubuntu**
